About Us

Hien Khai Canada Trading Co.,Ltd arises as a sole supplier and distributor of aluminum extrusion in Canada . Our main products includes aluminum alloys 6063 T4-T5-T6, 6061-T4, T6, 6N01-T5, 6005, 6082, 4032, 7003, 7005, 7075, 7003, 7050, 2014, 2024.... which are widely applicable in building and construction industries. We operates one of the largest manufacturing facility in Vietnam with operation in both South and North of Vietnam. We are driven to deliver fast , reliable and high quality aluminum profile, utilizing advance technologies and equipment at a competitive price to our customers.

Our FACTORY

Situated in both North & South Vietnam, operating over 420,000 square meters of land-field and 1,500 employees. Our factory are one of the largest operating aluminum extrusion facility in Vietnam, carrying over 40 extrusion press machine , in-house powder-coating line , anodizing line and in-house mold fabrication facility. Our maximum production capacity each months are 5000 metric tons. We are currently serving over 15 countries , exporting globally such as Japan, USA, Canada , Germany and etc .

Our Machinery

Machinery Type	Quantity
Melting Facility	5
Aluminum Extruder	44
The largest machine size (inch)	12
Powder Coating Line	7
Anodizing Line	3
Liquid Painting Line	1
Wood Grained Printing Line	6
CNC Machines	67
• Taroure Machines	2
• Cut Machines	1
• Solder Machines	33
• Stamping Machines	21
• Drill Hole Machines	10
Total Capacity :	5,000 tons/month

RANGE OF THE

ALUMINUM
ALLOY

HARDNESS

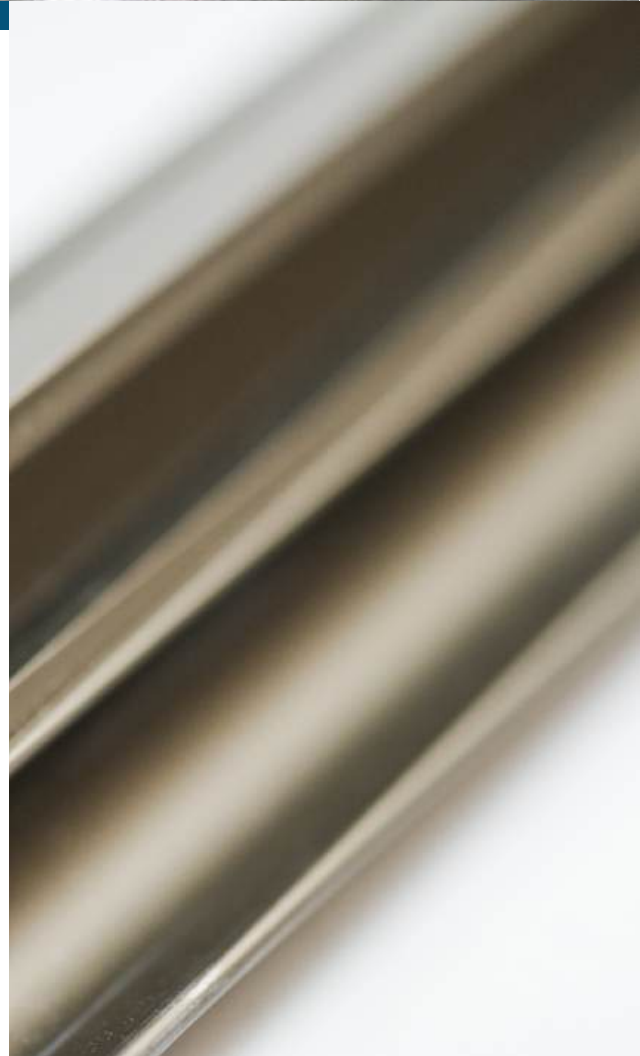

VAST VARIETY OF ALUMINUM ALLOY

We offer an extensive range of profiles of aluminum alloy includes **6063 T4-T5-T6, 6061-T4, T6, 6N01-T5, 6005, 6082, 4032, 7003, 7005, 7075, 7003, 7050, 2014, 2024** and much more. Using modern smelting technology, we offers adjustment to the alloy properties to alter the hardness , density and stress level of the aluminum profiles. Special request and requirements from clients can be assisted by our own teams of experienced engineers.

POWDER COATING LINE & PROCESS

Our powder coating process applies electrostatic principles to create an effect between the paint powder and the paint object, thereby coating a plastic layer on the surface of the parts. As a result, the electrostatic coating protects materials from direct contact with the environment, increases longevity, aesthetics, and is suitable for many purposes in the architectural and industrial fields. Our paints are guaranteed 20+ years warranty by Tiger, PPG and AkzoNobel

Trusted By PPG / Tiger / AkzoNobel

ANODIZING LINE & PROCESS

Anodizing process helps aluminum to create a surface that is three times harder than standard aluminum, in result, the outer layer surface of the material will not chip, flake, or peel, even when processed to add colour. Because of the anodization process is controlled oxidation of the aluminum, the finished product will never rust, corrosion or scratches. Perfect for outdoor usage to endure the harsh weather for longer lifespan

WOOD GRAINED PRINTING

www.hienkhaitrading.com

WOOD GRAINED

PRINTING

Industry leading technology

Our industry leading wood grained sublimation machine wraps a thick layer of wood grained film on the surface of the powder coated aluminum profile, and is then put into a high heating temperature to create a natural yet wooden textured aesthetic appearance on the outside. Our most popular applicable products of the wooden grained print includes windows & doors, outdoor pergolas , aluminum exterior siding or cladding , aluminum fences and railings. We have 6 pools of printing line , with up to 1500 metric tons production printing capacity per month. We also have a wide range of different wood texture , colour and profile to choose from.

HIGH-QUALITY

PolyVinylidene Flourine **COATING**

www.hienkhaitrading.com

PVDF / PolyVinyliDene Flourine COATING

PVDF Coatings are a common industrial standard for metals, especially aluminum. PVDF is a fluoropolymer-based resin used for coating in many industries and applications for their brilliant weather and UV resistance and unique flexibility. PVDF coating is resistant to UV rays and keeps your aluminium looking brand new for many years. It Offers Damage Resistance. PVDF coatings offer damage resistance to a wide variety of factors. These coatings can protect against weather, general wear, abrasion, corrosion and more. PVDF coatings is a popular use in aluminum siding , windows and curtain walls.

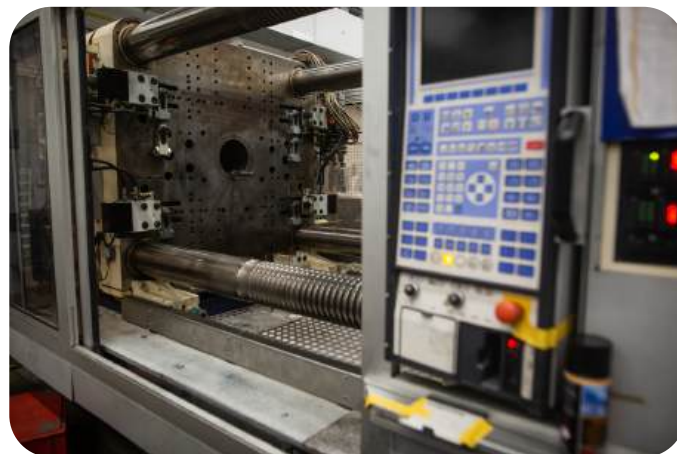

Why CHOOSE US

Our Advantages

Inexpensive New Molds for New Customers.

We offer inexpensive new mold for all aluminum extrusion profiles for our new clients as a benefit for collaborating with Hien Khai. We understand the frustration of changing new supplier with added cost for re-developing the molds and relationship. **Once the client reached to a volume of 5 tons, the mold fee will be 100% refunded to our client ends.**

Fast & Reliable Shipping. We offer direct container door to door shipping to our clients warehouse or door front. Our container shipment timeline is **30 - 45 days** direct from Ho Chi Minh port to Canada and the United States.

Competitive Pricing and OEM. Every month , we priced the container base on monthly LME price of aluminum ingots. Due to the facts that LME price fluctuate from month to month , we try to offer the most competitive conversion fee for our extrusion to accommodate our client costs. Providing the most reliable production turn-around time and service **as well as avoiding tariffs from China imported goods.**

Vietnam **CANADA** Fair Trades Agreement

To boost bilateral collaboration, the two countries established the Canada-Vietnam Joint Economic Committee (JEC) on January 10, 2022. Co-chaired at the Deputy Minister level, the JEC offers a forum to address current and emerging bilateral trade and commercial matters. The inaugural meeting of the JEC took place in Vancouver on July 6, 2022.

Building upon the momentum of high-level discussions, Canada's Minister of Export Promotion, International Trade, and Economic Development, Mary Ng, is leading a mission to Vietnam from March 27 to 29, 2024. This mission aims to explore export opportunities within the Indo-Pacific region, with Minister Ng accompanied by over 135 Canadian businesses and organizations. During the visit, discussions with international counterparts will focus on promoting sustainable and inclusive trade practices. Additionally, Canadian enterprises are expected to establish meaningful connections with potential business partners and clients in Vietnam.
